INDUSTRIAL EXPERIENCE

FAO, Lima, Peru

Carbon specialist July 2020-2021

- Designed and implemented methodologies for carbon stock assessment to support Peru's Forest Reference Emission Level (FREL) under REDD+ framework guidelines.
- Led the technical evaluation and reporting of national forest carbon stocks, contributing to Peru's greenhouse gas inventory and climate change mitigation commitments.
- Collaborated with interdisciplinary teams to ensure data quality, methodological consistency, and compliance with international carbon accounting standards.

CIFOR, Iquitos, Peru

Research Assistant 2013-2015

- Conducted soil carbon stock monitoring in lowland peatlands dominated by *Mauritia flexuosa* (Arecaceae), contributing to long-term assessments of tropical peatland carbon dynamics.
- Collected and analyzed CO₂ and CH₄ gas samples from soils on a monthly basis to quantify greenhouse gas fluxes and inform ecosystem carbon balance models.
- Supported data management, field logistics, and calibration of equipment for tropical peatland carbon research projects.

Field Assistant

2015

- Collected and processed soil samples for carbon stock quantification in both natural forest and oil palm plantation systems in the Ucayali region of Peru.
